SUMMARY

Full-stack software engineer (Java, Spring Boot, React) with hands-on experience building REST APIs, responsive web interfaces, and MySQL-backed applications. Strong foundation in data structures, OOP, and design patterns; comfortable across the SDLC from design to deployment. Seeking Software Engineer / Full Stack Developer / SDE roles where I can build scalable, production-quality applications.

TECHNICAL SKILLS

- **Languages:** Java, C, JavaScript
- **Frontend:** React.js, HTML5, CSS3, Responsive Design
- **Backend:** Spring Boot, REST APIs
- **Databases:** MySQL, SQL, Firebase
- **Concepts:** Data Structures & Algorithms, OOP, Design Patterns, SDLC
- **Tools & Version Control:** Git, GitHub, VS Code

WORK EXPERIENCE

Web Developer — Airtel Solutions Feb 2026 – May 2026

- Built and maintained responsive business-website UIs with React.js, HTML, CSS, and JavaScript across multiple pages and components of the site.
- Implemented UI/UX components and optimized front-end performance through code-splitting and asset optimization to reduce page load time.
- Handled content integration, cross-browser testing, and deployment as part of a remote, project-based team.

PROJECTS

AirCare — AI-Powered Hospital Air Quality Monitoring System

Java, Spring Boot, React.js, MySQL, REST APIs, Web Speech API | [Live Demo](#)

- Built a full-stack monitoring platform tracking air quality across hospital OT, ICU, and ward environments, with a real-time dashboard for facility staff.
- Designed Spring Boot REST APIs and a MySQL schema for environmental data storage, threshold-based alerting, and reporting.
- Added a voice-enabled assistant (Web Speech API) and a Digital Twin simulation to make readings easier to interpret for non-technical hospital staff.

Tourify — Travel Itinerary Planner

Java, React, JavaScript, HTML5, CSS3, MySQL, REST APIs | [GitHub](#)

- Developed a full-stack itinerary-planning app supporting multi-day trips, day-wise scheduling, and destination tracking.
- Built a responsive UI backed by REST APIs and a MySQL database for persisting itinerary and destination data.

Bank Management System

Java, MySQL | [GitHub](#)

- Built a Java application simulating core banking operations — withdrawals, fast cash, and PIN change — with a MySQL backend.
- Designed the database schema and backend logic to keep transaction handling consistent.

EDUCATION

Master of Computer Applications (MCA) 2024 – 2026

D.Y. Patil College of MCA & Management, Akurdi — CGPA: 8.88 (final semester results awaited)

Bachelor of Computer Science 2021 – 2024

Pune University — CGPA: 9.32

Higher Secondary Certification (Science) 2019 – 2020

Nirmal Bethany Jr. College — 91.67%

ACHIEVEMENTS

- Published research paper, and Presented "Cloud Computing as a Catalyst for Start-up Innovation," at International Conference DYPIMS, Pune (2025).
- Secured 1st Rank in the TechnoCase Case Study & Programming Competition, IICMR College.
- Ranked 1st in B.Sc. Computer Science for three consecutive years.

CERTIFICATIONS & COURSES

- C Programming • NPTEL — Java Programming • NPTEL — Data Structures and Algorithms using Java
